## Employment History

### UI Engineer at Apple Inc.

05/07/2018 – Present

- Building internal UI applications using ReactJS ecosystem.
- As the only UI engineer on my team, I **released first production version within 5 months since the hire date**.
- The application is **running on hundreds of machines** for **more than 6 months without major crashes**.

### Lead Software Engineer at Flywheel B.I.

11/09/2015 – April 2018

- **Lead system designer** and **implemented initial iterations of a dozen of critical features** for a Saas platform built with MeteorJS and ReactJS. Responsible for both frontend and backend implementation.
- **Collaborated with another team member** and **completed a sales feasibility tool within 2 months** without prior knowledge of the development framework (ReactJS & Redux). The application **saved approximately a hundred hours of data-entering each month** while providing fast user experience and greater accessibility.

### Software Developer at EcoMotto Inc.

08/17/2015 – 10/2015

- As a full-time employee, designed and built an **Android application prototype using Java**. The application is a part of a larger ecosystem to support remote-controlled home thermostats.
- Later, I came back as a part-time contractor (04/2016) and **fully developed a single-page application** that remotely controls home thermostats **within 1 month**.

## Education

### Computer Science, The University of Texas at Dallas

08/2011 – 05/2015

Recipient of **Academic Distinction Scholarship. Graduated Cum Laude** with 3.618 GPA.

## Extra-curricular activities

### Won 2 Hackathons

- As a student, I participated in several hackathons and **won 2 prizes**. One was **awarded by AT&T for Best Mobile App for Connected Cars**.
